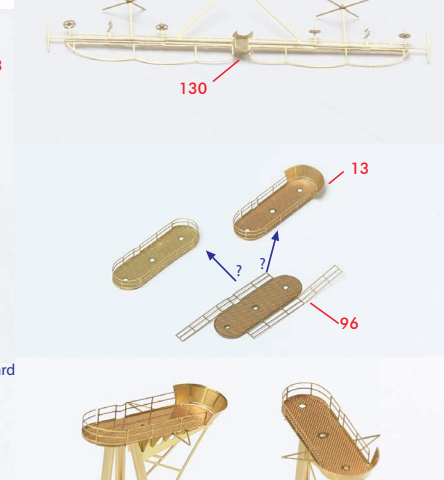

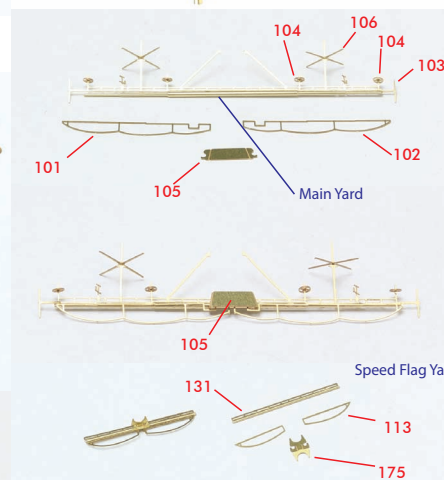

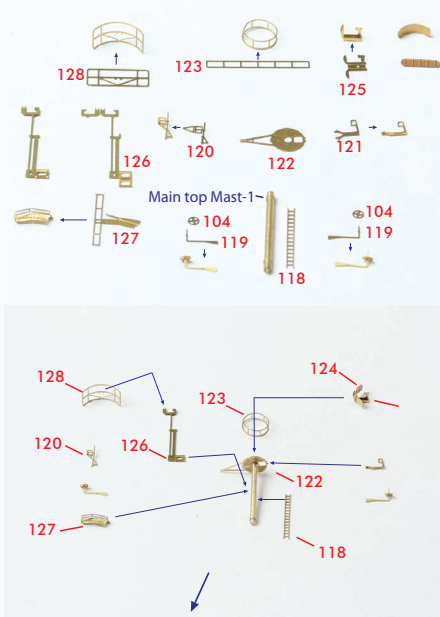

Figure 1 illustrates the evolution of the Late type and Early type of the 1950s Japanese paper airplane. The Late type (left) starts with parts 53, 57, 61, 59, 62, 58, 60, and 38, leading to a final assembly. The Early type (right) starts with parts 55 and 56, leading to a final assembly. The diagram shows how these two types converge into a common final assembly through various intermediate steps.

The diagrams illustrate the construction of a complex structure, likely a bridge or a large frame, using a combination of components labeled 251, 252, 253, and 254. The assembly process is shown in several stages:

- Top Diagram:** Shows the initial assembly. Component 254 (a rectangular frame) is combined with component 252 (a small triangular structure) to form a larger unit. This unit is then combined with component 253 (a larger rectangular frame) to form a more complex structure. Finally, component 251 (a large triangular structure) is added to complete the top section.
- Middle Diagram:** Shows the assembly of the middle section. Component 254 is combined with component 251 to form a larger unit. This unit is then combined with component 253 to form a more complex structure.
- Bottom Diagram:** Shows the final assembly. Component 254 is combined with component 251 to form a larger unit. This unit is then combined with component 253 to form a more complex structure. Finally, component 252 is added to complete the bottom section.

The image displays 12 photographs of plastic model parts for the Borfos barrel, arranged in a grid-like fashion. The parts are shown in various stages of assembly and from different angles. The components are labeled with letters and numbers:

- Top Left:** A small assembly of three parts labeled N, K, L, and M.
- Top Right:** A large, complex assembly of parts, including a barrel section.
- Middle Left:** A view of the Borfos barrel assembly with parts labeled 477, 481, 283, 479, 475, and 471.
- Middle Right:** A view of the Borfos barrel assembly with parts labeled 472, 479, K, J, and 471.
- Bottom Left:** A view of the Borfos barrel assembly with parts labeled 476 and 473.
- Bottom Middle:** A view of the Borfos barrel assembly with parts labeled M (OPTION) and 472.
- Bottom Right:** A view of the Borfos barrel assembly with parts labeled 483 and L.

The image displays the assembly of a 5in barrel -2 without Blastbag. The top row shows four green plastic components labeled A, B, C, and D. The middle row shows two grey plastic components: one labeled '5in barrel -3 With Blastbag' and the other '5in barrel -2 without Blastbag'. The bottom row shows various metal parts including a base plate (309), a barrel (310), and various small components (370, 403, 402, 401, 388, 351, 325, 389, 405, 404).
